

# YipTel Business

YipTel Business is the evolution of Business Phone Systems. Hosting your phone system means there is no expensive equipment to buy, manage or maintain. It also includes your dialtone services.

In most cases you will pay less than what you are paying your current telecom provider for just dialtone. In addition to lower costs, you will also be provided with dialtone, phones for every desk, unlimited access to service and support. It's truly a no brainer. Call today to begin service 1-800-752-6110.

## HIGHLIGHT FEATURES

**Call Recording** | YipTel is one of the only hosted providers that offers One Touch Live Recording, and Automatic Recording at no additional cost.

**Simultaneous Ring** | Now you can ring your desk phone, your cell phone or any other phone all at the same time. Never miss another call again.

**Marketing Tracker** | YipTel's Marketing Tracker allows you to publish separate numbers in your different marketing media and track the number of calls that you receive. Yiptel will show you which of your marketing dollars are effective.

**Mobile Extension** | Now you can take your phone anywhere, plug it in to an Internet connection, and place and receive calls.

**Voice Mail to Email** | Now you can have your voicemail sent as a .wav file to your email. This provides visual access and is a great time saver.

**Optional Fax \*** | Would you like to receive your faxes directly to your desktop? Yiptel fax to desktop is the perfect feature to add for sending and receiving from your desktop.

**10 Party Conference Calls** | Host up to 10 party conference calls in the conference center as part of your monthly service.

**Automated Attendant** | Choose full Automated Answering or simply backup your live staff. Create professional day and night greetings.

## BENEFITS

**No Capital Outlay** - No large up front capital outlay on highly depreciable equipment. Phones are just part of the service.

**No Long Distance** - For calls between Ogden and Payson & in the St George calling area.

**Keep Your Numbers** - You can keep all of your same phone numbers when you switch to YipTel.

**Unlimited Lines** - As many calls as you can make.

**Single Source Provider** - Local, Long Distance, Internet, and telephones can be all from one provider, on one bill.

**Web Based Technology** - Most phone systems today are premised based utilizing proprietary technology. YipTel is web based and provides an easy to use web site to manage your phone calls in addition to the phone.

**Total Flexibility** - Subscribe to the number of phones you need now then add more whenever you want.

**Total Customization** - Your phones are customized to your businesses specific needs with custom greetings, music on hold, ringing patterns and much more.

**Flat Rate Pricing** - Pay the same monthly rate for service.

**Free Upgrades** - YipTel provides features through a redundant central platform that is constantly being updated with new features and enhancements. You receive the updates free of charge so your service just keeps getting better.

**Business Class Service** - YipTel systems can be delivered through MPLS DSL or Dedicated T-1 Service to assure the highest quality connections to your business.

**Connect Anywhere** - YipTel phones can be moved anywhere! Take your phone home, on the road, or anywhere you choose. Plug it in to the Internet and it's just like you are working at the office.

**Digital Connections** - Quality of service is amazing thanks to YipTel's technology. All connections are digital vs standard analog connections. You will notice a difference in the call clarity over analog telephone lines.

**Disaster Recovery** - Call processing is done off-site. In the event of a disaster, phones can be easily moved and you can be back in business immediately. If needed, call logs and recordings can be downloaded to your server.
